SUMMARY

Computer Science student specializing in Artificial Intelligence and Full Stack Development. Skilled in Python, Machine Learning, NLP, and MERN stack development. Experienced in building scalable web applications and AI-based solutions. Seeking internship opportunities in Artificial Intelligence and Full Stack Development.

EXPERIENCE

AI & Full Stack Developer

AI & Full Stack Developer (Projects)

📅 01/2024 📍 Tamil Nadu, India

Internship position focused on Artificial Intelligence and Full Stack Development

- Built AI and MERN stack applications using Python and JavaScript
- Developed **REST APIs with JWT authentication supporting 100+ test requests/day**
- Implemented Machine Learning and NLP models

EDUCATION

B.TECH-Computer Science and Engineering

Kalasalingam Academy of Research and Education

📅 08/2024 - 05/2028 📍 Tamil Nadu, India

STRENGTHS

Teamwork

Teamwork and collaboration skills demonstrated through various projects and hackathons

Leadership

Leadership qualities exhibited in project management and team assignments

Problem Solving

Strong problem-solving capabilities developed during project work and competitive programming

KEY ACHIEVEMENTS

Hackathon Finalist

Secured 6th place in university hackathon as a Hackathon Finalist, showcasing problem-solving and teamwork skills

PROJECTS

Intelligent Resume Skill Matching

📅 01/2026 📍 Tamil Nadu, India

An innovative project to match skills listed in resumes using AI techniques

- Developed an AI-powered resume skill matching system using Python, NLP, and Machine Learning.
 - Implemented **semantic similarity matching** using **Transformers and Scikit-learn**, improving skill matching accuracy.
 - Built a **full-stack web application** using **React frontend and Python REST APIs backend**.
 - Processed and analyzed **100+ sample resumes and job descriptions** for testing and validation.
-

Civic Issue Reporting Portal

📅 01/2025 - 12/2025 📍 Tamil Nadu, India

Full-stack web application for reporting and tracking civic issues with real-time updates.

- Developed MERN stack application for civic issue reporting.
- Built REST APIs with JWT authentication.
- Added image upload and GPS tracking.
- Built responsive web interface.
